The **Global Community Network** is a **system of services and models of exchange** that allows all the actors involved in the Fondazione Willy Brandt's network to communicate and to work entirely for the development and the enrichment of the themes under discussion.

This is an inter-institutional model aiming at the common use of instruments and opportunities and at exploiting advantages and potentialities coming from the comparison of experiences and from the enlargement of the processes of governance.

In addition to the guarantee of this fundamental principle of fairness, the **Global Community Network** was born and operates to valorise and diffuse excellence and vocations achieved in single sectors.
