

Fondazione Willy Brandt

---

## Dr. VINCENZO PIRONE

Chemical-biologist, project manager of the **Fondazione Willy Brandt**, was Technical Director of Pharmaceutical Establishment **Richardson-Merrell**, and covered numerous tasks in chemical companies in particular with dedicated commitment to research and technological development of new molecules.

Mr Pirone is a founding member of society **Ecopraxis Srl** (operating with renewable energy) for the care of the field of new technologies and emerging markets.

For several years he worked with the **DIMP** (Department of Materials Engineering and Production), **University of Naples Federico II**, participating in the drafting of projects, laws and actions in the sphere of the environment in behalf of various public institutions. He worked at the **Department of Ecotoxicology**, University of Florence dealing with pollution by toxic agents in high-risk companies.

He also was a consultant at the leading national companies operating in the sectors of reclamation of the contaminated areas, managing cycle of the integrated waste, characterization and interventions of rehabilitation in industrial areas, treatment of sludge dredging, techniques of disposal and processing of biodegradable materials.

He has participated in many tests and examination concerning reclamation interventions. He gained good experience in processes of pyrolysis and gasification of biomass to produce electricity. Engaged with Protection of the Environment, he has conducted educational activities of preparation of technicians and operators, both from public and private sector. Collaborates with Federambiente.

And he is also member of the board in "FSC-Forest Stewardship Council" which is engaged in the fight against deforestation and desertification.
